Since, the Surgeon General has identified tobacco use as the number one preventable cause of death in the United States, and the @tional Centers for Disease Control and Prevention reports

4

that tobacco use kills more Americans than motor vehicle crashes, AIDs, cocaine use, heroin use, homicide, and suicide combined; and

Sto, a survey by the Tompkins-Seneca-Tioga SOCES between 1996 and 1998 of students in grades 6 through 12 found that 54% had tried cigarette smoking; 35% had smoked a whole cigarette before they were 15 years old., and 19% had already tried to quit; and

Sinee, a survey of 82 retail tobacco stores in Tompkins County in 1998 by the I)ivision of Environmental Health revealed that 52 (63%) maintained self-service of toba@co products,- and

Sloce, New York State and Federal laws restrict the use of tobacco products in public places ar#d work sites and the sale of tobacco products to minors under the @ of eighteen and these restrictions are enforced by the Tompkins County Health Department through the Division of Environmental Health; and despite these restrictions, ininors continue to start smokiru3; and

Sime, self-service of tobacco products implies the some level of consumer safety and acceptance as other self-service products such as gum and candy, and restricting self-service will reduce tminors'access to tobacco products by requiring sales to be made by personal transactions; and

Since, @ Board of Representatives of Tompkins County believes restricting the self-service sales and open displays of tobacco products will promote the health, sof cty, and welfare of residents of Tompkins County under the age of eighteen;

On June 2. 19915, the Tompkins County Board of Representatives passed Local Low 3 Regulating the Self Service Sale of Tobacco Products. The Low states that "no person, business, or tobacco retailer shall sell, permit to be said, offer for sale or display any tobacco product by means of self -service. merchwwislrq."
